

Finfare, Inc.

Finfare Accessibility

Version 1 - Last Updated: 4/13/2023

Finfare is committed to maintaining a website that is accessible to the widest possible audience, regardless of technology or ability. This commitment includes ongoing efforts to increase the accessibility and usability of the Finfare website and an adherence to many of the universally accepted standards and guidelines.

Finfare's website strives to achieve compliance with the World Wide Web Consortium (W3C) Web Content Accessibility Guidelines 2.1. These guidelines provide advice on making web content more accessible to people with disabilities, and conformance with the guidelines help make the web more user friendly for all people. The Finfare site has been built on code compliant with W3C standards for HTML and CSS. The site displays correctly in current browsers and using HTML/CSS compliant code means future browsers will also display the site correctly.

Finfare strives to adhere to the accepted guidelines and standards for accessibility and usability, but strict adherence is not always achievable in all areas of the website.

Finfare will therefore continue our pursuit of solutions to raise all areas of our site to a consistent level of overall web accessibility. While we're undertaking these efforts, please don't hesitate to contact us should you experience any difficulties with accessing the Finfare website:
